DETAILED ACTION

Allowable Subject Matter

1. Claims 1-43 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Scarpitti (US Pat. 5,952,732) discloses a vehicle security system that includes a switch located within the trunk of a vehicle that will allow a person to actuate the switch trapped inside. The switch will transmit a signal to the brake of the vehicle and upon the vehicle coming to a complete stop, the system will unlatch the trunk (Col. 6, lines 55-67; Col. 7 and Col. 8, lines 1-27). Ogino et al. (US Pat. 5,404,128) discloses a vehicle system that determines whether a seat within the vehicle is being occupied based on the combination of various sensors such as the monitoring the seated person's heart activity, vibration and breathing (Col. 7, lines 38-68; Col. 8, lines 1-26). However, neither of the above references nor any other prior art of record disclose in their entirety or in combination the claimed method for detecting an unsafe condition within a trunk of a vehicle comprising the steps of disposing a living person or animal within the closed trunk of the vehicle; and detecting the respiration of the living person or animal in the trunk.

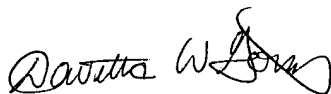

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
